PROJECTS

Game Development

Dec 2019 – Present

- Developed multiple games across **Unity (4+ years)** with **C#** and **Godot (2+ years)** **GDScript**.
- Designed, developed, and composed music for multiple game jam and experimental projects, including *Awake in Fear*, a 3D horror RPG worked on for 2 years, *Key Run*, *Dislodged*, *Dolkroc*, *Grimpart*, *Depteavor*, and *Luminox*.
- Participated in 6 game jams solo and built additional skills in 8-bit music composition and pixel art.

NoLoginShare (nologinshare.vyomeshj.com)

Feb 2026 – Present

- Built and deployed a secure self-hosted temporary file-sharing platform using **Next.js**, **Express.js**, **SQLite**, and **Docker**.
- Implemented password-based **AES-256-GCM** file encryption using salted key derivation, so encrypted files can only be decrypted with the correct user password.

Self-Hosting Home Lab

Jun 2025 – Present

- Maintaining a 24/7 **Ubuntu** home server exposing services using **Cloudflare Tunnels** and **Tailscale** VPN.
- Containerized services using **Docker** and implemented **GitHub Actions** for automated CI/CD of the apps I developed and deployed; Services include: NoLoginShare, LockedInDoro, Strapi CMS, Nextcloud, Immich, arr-stack, Jellyfin, Portainer.

Research Publication ([Link](#))

Jun 2023 – Nov 2023

- First author of a research paper on AI-assisted digital pathology for distinguishing adenocarcinoma and squamous cell carcinoma.
- Paper published in the **IEEE M2VIP International Conference 2023**.

Game Developers Guild Website (uoagd.com)

Dec 2025 – Present

- Developed the website using **Next.js** and deployed on **Vercel**.
- Deployed a self-hosted **Strapi** CMS on my home lab server to manage and publish club events.

LockedInDoro (lockedindoro.vyomeshj.com)

Dec 2025 – Present

- Built and deployed a productivity web app using **Next.js**, **Google OAuth**, and **PostgreSQL**.
- Implemented time tracking for each study session, including daily, weekly, and total study time, with session checks to prevent multiple active instances from running simultaneously.

EXPERIENCE

GMFB Research - Software Engineer

Sep 2026 – Present

- Developing a scalable development and deployment pipeline for **80+ client websites** while working part-time.
- Built a self-hosted **Payload** CMS setup using **Docker**, **Nginx**, **blue-green deployments**, and **Cloudflare R2** on VPS.

President - Game Development Guild (UOAGDG)

March 2026 – Present

- Collaborated with the Maker Club to design and build a custom arcade machine with joystick and button controls
- Secured GDG's admission into the Maker Space Residency Program, giving the club access to tools and resources to build a V2 of the arcade machine.
- Self-hosted internal club tools including **BookStack** for documentation and **Vikunja** for project management, alongside setting up **Cloudflare email routing** for domain-specific club emails.
- Represented GDG at Indie Game Showcase 2026 and will represent the club at Overload 2026.
- Co-organized a board game night with the Korean Engineering Body (KEB) and Board Game Club, increasing GDG's visibility across other student communities.

WDCC Project - WEB3UOA

April 2026 – Present

- Contributing to WEB3UOA project as a WDCC project, focusing on backend database functionality and user registration.
- Built and integrated a **Supabase** backend for crypto wallet-based login and signup functionality.

Tutor - MyTuition

July 2025 – Present

- Tutor students in Cambridge IGCSE and A-Level Physics, Computer Science, and Mathematics.

EDUCATION

University of Auckland

Auckland, New Zealand

Bachelor of Science in Computer Science

Mar 2025 – Present

- GPA: 8.9 / 9.0 (A+ Average)
- First in Course Award** in COMPSCI 110 (1/412)

TECHNICAL SKILLS

Languages: Python, C#, JavaScript/TypeScript, Bash, GDScript, Java

Frameworks/Libraries: Next.js, Express.js, React

Engines: Godot, Unity

Tools/DevOps: Git, GitHub Actions, Docker, Linux, CI/CD pipelines

Soft Skills: Team Leadership, Public speaking, Event coordination, Problem solving
