PROJECTS

Game Development

Dec 2019 – Present

- Developed multiple games across **Unity (4+ years)** with **C#** and **Godot (2+ years)** **GDScript**.
- Built and released *Awake in Fear*, a 3D horror game developed over 2 years with event-driven mechanics and progress-saving systems in a RPG game format.
- Designed, developed, and composed music for multiple game jam and experimental projects, including *Key Run*, *Dislodged*, *Dolkroc*, *Grimpart*, *Depteavor*, and *Luminox*.
- 4+ years of experience in Unity and 2+ years in Godot; participated in 6 game jams, rapidly prototyping and delivering complete gameplay experiences under time constraints; additionally developed skills in 8-bit music composition and pixel art.

NoLoginShare ([nologinshare.vyomeshj.com](#))

Feb 2026 – Present

- Built a secure self-hosted temporary file sharing service with an **Express.js** backend and **Next.js** frontend.
- Ensured uploaded files are encrypted for secure storage and transfer.
- Used **SQLite3** to store file metadata, file paths, and hashed passwords.
- Implemented automatic file expiration and deletion after user-defined durations (6, 12, or 24 hours).
- Containerized the application with **Docker** and deployed it on a self-hosted homelab server.

Self-Hosting Home Lab

Jun 2025 – Present

- Maintaining a 24/7 **Ubuntu** home server exposing services using **Cloudflare Tunnels**.
- Used **Docker** containerization to run services including NoLoginShare, Strapi CMS, Nextcloud, Immich, the arr-stack, Jellyfin, and Portainer for container management.
- Configured **Tailscale** VPN for secure remote SSH access and access to private applications running.

Research Publication

Jun 2023 – Nov 2023

- First author of a research paper on AI-assisted digital pathology for distinguishing adenocarcinoma and squamous cell carcinoma.
- Paper published in the **IEEE M2VIP International Conference 2023**.
- Collaborated with Mr. Munawar Hayat (Senior Lecturer, Monash University; currently at Qualcomm).

Game Developers Guild Website ([uoagd.com](#))

Dec 2025 – Present

- Developed the website using **Next.js** and deployed on **Vercel**
- Deployed a self-hosted **Strapi** CMS on a home lab server to manage and publish club events.

EXPERIENCE

President - Game Development Guild (UOAGDG)

March 2026 – Present

- Grew the club to 75+ registered paid members within the first semester by pushing out the club in more spaces
- Collaborated with the Maker Club to design and build a custom arcade machine with joystick and button controls, featuring a modified version of my game *Curse of the Sea*.
- Secured admission of GDG into the Maker Space Residency Program, giving us access to tool that we would be using to create a V2 of the arcade machine
- Co-organized a board game night in partnership with the Korean Engineering Body (KEB) and the Board Game Club, bringing GDG more in light and known to others

Tutor at MyTuition

July 2025 – Present

- Tutor students in Cambridge IGCSE and A-Level Physics, Computer Science, and Mathematics.
- Received referrals from parents to tutor additional students based on performance and teaching quality.

EDUCATION

University of Auckland

Auckland, New Zealand

Bachelor of Science in Computer Science

Mar 2025 – Present

- GPA: 9.0 / 9.0
- **First in Course Award** in COMPSCI 110

TECHNICAL SKILLS

Languages: Python, C#, JavaScript/TypeScript

Frameworks: Next.js, Express.js

Tools: Git, Docker, Linux
